It is my proud privilege to present another informative and updated issue of the IP Journal of Diagnostic Pathology and Oncology. The review articles, original articles, and case reports cover different aspects of solid tumors and hemato-oncology, with special emphasis on the latest molecular methods of diagnosis of tumors.

The various complications of patients receiving cancer therapy and standardized dietary guidelines for cancer patients have been highlighted in articles that will be very beneficial for oncologists and caregivers.

The original articles on CNS tumors, lung tumors, hepatocellular cancers, and acute myeloid leukemias provide valuable insights into these dreaded malignancies.

The interesting case reports showcase well-worked-up cases which make us aware of rare entities and associations. I express my gratitude to all the authors for submitting their hard work to the IP Journal of Diagnostic Pathology and Oncology. I also congratulate the publishing team for bringing out yet another wonderful issue on time.

As we slowly move toward the end of this year, our team wishes you and your loved ones a joyous, fun-filled holiday season filled with warmth, happiness, and good health.

Happy reading...

Dr. Indranil Chakrabarti

MBBS, MD, FIAC
