A very happy new year to all the readers of IP Journal of Diagnostic Pathology and Oncology. It is time for yet another informative issue of the journal which covers the various aspects of tumor diagnosis and research.

The articles cover the basics of hematopathology focusing on anemia and its diagnosis, as well as various transfusion-related infections.

The original articles provide valuable insights into the diagnosis and treatment of oral cancers, malignancies of the gastrointestinal and genitourinary tract as well as breast tumors. Special emphasis is given to the role of immunohistochemistry in the diagnosis of malignancies.

The case reports deal with interesting, well-worked-up cases with important take-home messages.

I express my sincere gratitude to all the authors for submitting their hard work to the journal and all the reviewers for patiently reviewing the submitted articles.

I also congratulate the publishing team for bringing out this wonderful issue on time.

*Happy reading...*
